

The Studio 1 Collection

It's recognising the influence of bold ideals

It's no surprise that to create a modern design, one has to consider how the past has influenced the present.

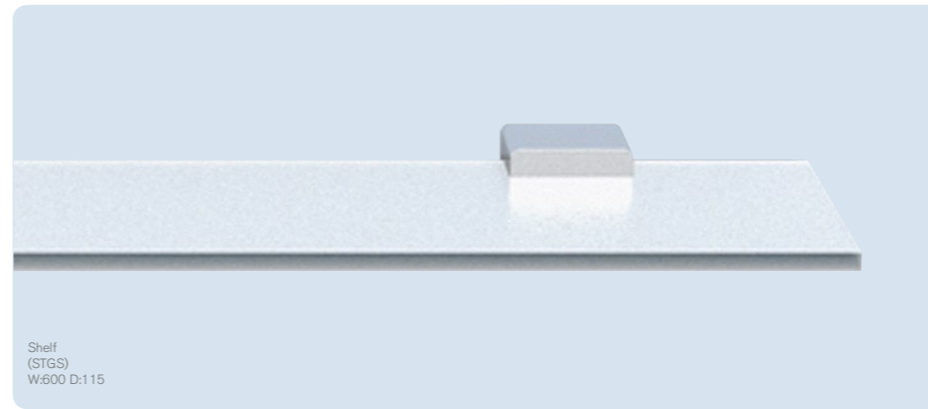

Coming to the fore is the ideal that people today can learn to live in harmony with nature; with design so well integrated that nature and building become part of a unified and interrelated composition.

The Studio 1 collection, designed with the future in mind and for the mind of one who appreciates the legacy of powerful ideals. Hence the bold and strong styling, but empathetic to the form of nature.

The Studio1 collection is constructed from brass with a chrome finish and naturally a five-year warranty ensures it will stand the test of time.

Counter Top Soap Dish (STCSD)

Shelf (STGS)
W:600 D:115
