

Miles Nelson was established in 1928 to manufacture high quality hardware products from a central Auckland factory in Airedale Street. Now located on Auckland's North Shore, the company supplies a wide range of imported and locally manufactured hardware products, maintaining a reputation for high quality products and excellence in customer service. Miles Nelson is New Zealand owned and operated and takes pride in designing and supplying innovative hardware products for the building industry. If you require any further information about the products shown on the following pages, please contact us and we can arrange for one of our representatives to visit you.

HOW TO DETERMINE DOOR HANDING

Determining handing when ordering door hardware is different to how you determine door handing for carpentry (ordering and hanging doors). The reason being that when ordering hardware it matters which side the lock is on - where for carpentry it does not. If you follow the standard carpentry rules for handing, instead of following the diagram below, there is a good chance you may end up with a lock that is backwards. Please refer to the diagram below and if you have any questions, please give us a call.

Stand on the secure side of the door (where you would insert your key). For pairs, determine the hand of the active leaf. The active leaf is typically the door with the lockset. Both leaves may be active.

Follow These Steps:

- 1** Stand facing the door on the outside - If it's a locking door, stand on the side of the door where you would insert a key (or unlocking tool if it would be a privacy lock). For interior doors you would stand on the side of the door you enter from - i.e. in the hall if a hall closet, in the bedroom if a door opens to a bath, in the kitchen if a door opens to the pantry.
- 2** If the **hinges are on the left**, it's a **right hand door**. If the hinges are on the right, it's a left hand door.

DOOR HANDLES - COASTAL

KURA LEVER HANDLE - BRUSHED STAINLESS STEEL 304

Solid stainless steel handle. Suits door thickness 32mm-50mm.
