# BiLock New Generation

New Generation BiLock – Exploded View

BiLock's distinctive dual edged key and logo symbolise innovation, quality and reliability. These prime features have been recognised through the numerous design awards Australian Lock Company has received over the years.

Since introducing the BiLock high security Master Key range to the market over 30 years ago, Australian Lock Company has continued to re-engineer, evolve and refine the BiLock product range. The most recent development has been BiLock New Generation.

BiLock New Generation offers an intelligent new design and twin bladed key that operates a 12 pin programme of tumbler pins – 6 on either side. These pins in turn activate 2 sidebars to provide the end-user with up to 16,770,000 possible lock, key or cylinder combinations.

In addition to a space age moving component within the key, a uniquely shaped, horizontally positioned security rod has been built into the cylinder to activate the 13th locking dimension. Without

this component the 13th dimension cannot be activated which adds yet another feature to BiLock's exceptional level of quality.

The BiLock innovation has continued with the development of BiLock Quick Change Core or QCC. Now with QCC, re-keying can be as simple as withdrawing a plug & replacing it with another in a matter of seconds.

#### The main features of BiLock QCC are:

- Simplicity: easy to use with minimum maintenance
- Durability: fewer moving parts and a stronger key
- Tamper Resistance: a high level of pick resistance
- Flexibility: up to 17,000,000 combinations
- Compatibility: BiLock New generation and BiLock QCC can retrofit almost all hardware
- Cost Effectiveness: competitively priced to install and maintain.

• Locally manufactured, distributed and supported by the privately owned and operated Australian Lock Company.

Only authorised BiLock agents have permission to design, manufacture, install and maintain your BiLock high security master key system. Their ability to quickly change combinations and cut new or additional keys, means your system and security is never compromised.

In addition your BiLock agent will maintain and update your key registration details to ensure the integrity of your high security master key system at all times.

# BiLock Products

## The BiLock New Generation Colour Key System

BiLock New Generation has a new futuristic key head specifically designed to incorporate extensive colour coded master keying capabilities ensuring optimal security.

One, two or three different colours can be mixed & matched from the 20 colours available in any key head. This means a maximum of 8,000 colour combinations are available.

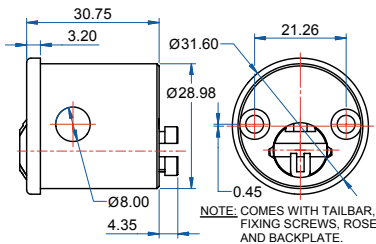

This new key head allows instant identification of keys by system managers & building supervisors & with ease visibly defines levels within a master key system.

## Euro Din Lock Cylinders

### Product

New Generation BiLock offers Euro din cylinders in double cylinder and the thumbturn versions. Australian Security Intelligence Organisation (ASIO) endorsed in its highest category for key operated locks. Chubb 3C10 and 3C20 locks are endorsed when used in specific New Generation BiLock applications. A range of endorsed padlocks, camlocks, switch locks and cylinders as contained in the Government's "Security Equipment Catalogue" are available to government departments.

## Switch Locks

### Product

New Generation BiLock offers a complete line of integrated and modular high security switch locks designed to adapt to a wide range of switching, voltage and current requirements. Combining New Generation BiLock security with a commercial micro switch provides a wide variety of electric switching operations for individual needs.

Special purpose switching applications can also be supplied to order in consultation with Head Office.

# Product Warranty

## BiLock High Security Master Key System

Australian Lock Company guarantees its range of BiLock High Security Cylinders & Keys against defects in workmanship & materials. Should the product be found to be defective within its normal working life, Australian Lock Company will repair or replace the product with the same or equivalent product free of charge upon receipt of proof of purchase.

Under this product warranty Australian Lock Company assumes no responsibility for the following:

1. Failure to adhere to fitting instructions or faulty installation.
2. Product wear & tear due to improper maintenance.
3. Product failure caused by the use of non BiLock parts.
4. Unauthorised modifications or repairs made to the product.
5. Use of unauthorised replacement parts.
6. Any costs incurred due to –
  - i) Removal & or replacement of the BiLock product.
  - ii) Freight & / or travelling time.
  - iii) Any modifications or repairs to the BiLock product unless authorised by Australian Lock Company.
7. Personal injury, property damage or economic loss however caused.
8. Damage caused by corrosion when the BiLock product is installed in a corrosive environment.

Nothing in this Australian Lock Company product warranty excludes restricts or modifies in any condition, warranty, right or liability implied or protected by law where to do so would render the guarantee or any part of it void.

Whilst the Australian Lock Company Pty Ltd has taken every effort to ensure that the information in this catalogue is accurate at the time of publication, we recommend that you consult your Sales Representative to ascertain information in specific products and specifications prior to placing your order. Please note that we reserve the right to make changes without notice. The Australian Lock Company Pty Ltd will not be liable for any damage or loss arising from any errors or omissions in the information contained in this catalogue or arising from the use of the information contained herein.
